Improving and Protecting Drinking Water Catchments

Dr Zoë Frogbrook

Sustainable Land Management Team Manager
Scottish Water
The Vision for our catchments

“Our drinking water catchments are managed in such a way that the quality of our source water allows us to deliver a safe and reliable supply that customers enjoy”
The Sustainable Land Management Team

- Catchment assessments
- SLM Incentive Scheme
- Catchment activities
- Consultations
Challenges to meeting our Vision

• Land in third party ownership

• Not aware of all activities in our catchments

• Benefits and cost effectiveness of catchment management may vary

• Can take years before benefits are shown

• Long term changes to source water quality
  ➢ e.g. Climate change
