

Improving and Protecting Drinking Water Catchments

Dr Zoë Frogbrook

**Sustainable Land Management Team Manager
Scottish Water**

The Vision for our catchments

“Our drinking water catchments are managed in such a way that the quality of our source water allows us to deliver a safe and reliable supply that customers enjoy”

Challenges to meeting our Vision

- Land in third party ownership
- Not aware of all activities in our catchments
- Benefits and cost effectiveness of catchment management may vary
- Can take years before benefits are shown
- Long term changes to source water quality
 - e.g. Climate change
